CSR and carbon footprint

Abalis has made CSR a central part of its business strategy.

As responsible actors, our management, teams and business partners strive to address environmental and societal challenges.

We have adopted a number of measures, such as the use of electric vehicles, waste sorting, the installation of reversible air conditioning and paperless invoicing.

In 2024 we adopted the “Bilan Carbone” accounting method to provide the insights needed to reduce our carbon footprint.
